

VENTURA MANAGED ACCOUNT PORTFOLIOS SUPERANNUATION (INCLUDING PENSION)

INVESTMENT MODEL MENU

1 November 2024

The PDS is issued by Diversa Trustees Limited ('the Trustee') ABN 49 006 421 638, AFSL 235153, RSE Licence No. L0000635, in its capacity as trustee of the Praemium SMA Superannuation Fund ('VMAPS Super' or 'the Fund') ABN 75 703 857 864, an APRA-regulated superannuation fund. Praemium Australia Limited ('Praemium', 'we', 'our', 'us') ABN 92 117 611 784 is the Sponsor of VMAPS Super.

VMAPS Super invests exclusively in the Ventura Managed Account Portfolios ARSN 601 085 410 ('VMAPS', 'the Scheme' or 'Managed Account'), a registered managed investment scheme of which Ventura Investment Management Limited ('Ventura') is the Responsible Entity.

This Investment Model Menu forms part of VMAPS Super PDS ('PDS') dated 1 October 2024 and provides information on the Investment Models available through VMAPS. You should read this information before deciding whether to join VMAPS Super.

The information in this Investment Model Menu is of a general nature. It has been prepared without taking into account your particular investment objectives, circumstances, financial situation or needs. Before acting on the information in this PDS you should consider your own objectives, circumstances, financial situation and needs. You should also consider seeking the advice of a licensed financial adviser. This publication is not intended to be, and should not be construed in any way as, investment, legal or financial advice.

The information in this Investment Model Menu is correct as at the date of publication. In the event of a material change occurring to any information contained in this Investment Model Menu, irrespective of whether it is adverse or not, the Trustee will notify existing members in writing within the time frames required by law. Updated information is available online at www.venturafm.com.au.

What is VMAPS

VMAPS is a registered managed investment scheme that provides access to a comprehensive range of Investment Models within a single consolidated investment Account (Account).

Investment Models are developed in conjunction with and managed by the investment manager(s) ('Investment Model Manager(s)').

INVESTMENT SUMMARY

You can choose the way your money is invested in VMAPS Super by constructing your Account using a range of available investment strategies, called Investment Models. Each Investment Model has a different degree of investment risk, together with a different expected level of earnings. This is because each Investment Model is made up of different proportions of asset classes and/or investments within a specific asset class.

You should consult with your financial adviser to choose the Investment Model/s that best meet your personal investment objective and strategy. Some of the factors which you may wish to consider based on your personal circumstances include the:

- amount of time your money will be invested;
- level of investment earnings, including interest, dividends and capital gains/loss and
- level of risk you are comfortable with for the level of forecasted return.

Before you invest, you must read a copy of this current Investment Model Menu for each Investment Model you choose to invest in. The Investment Model(s) describe the investment objective, the investment strategy, the risk and return profile, and the investment time-frame of the Investment Model. Your financial adviser will provide you with the current documents for the investments you are considering. You should also read a copy of this current Investment Model Menu before making additional investments, as the composition of the assets in the Investment Models may change over time.

Changes to Investment Models

Ventura has the right to change Investment Model(s) on the Investment Model Menu from time to time at its discretion. If your Account is invested in an Investment Model that is subsequently removed from the Investment Model Menu, you may be allowed to continue to hold the underlying investments in your Account, at the discretion of Ventura. Alternatively, if it is considered necessary, the Trustee may seek instructions to transfer these investments to another Investment Model(s) for you or where this is impracticable, to sell the investments on your behalf and pay the sale proceeds to your Cash Account.

Risk profile

Determining your risk profile with your financial adviser is very important as investment risk can mean many things. An investment may be considered as carrying more risk if it has a higher likelihood of negative investment earnings, or if the earnings from that investment are more volatile over time.

Risk can also mean the possibility of your investment not keeping pace with inflation. Your individual risk profile will depend on a number of factors including how long you have to invest or how comfortable you are with a higher level of investment risk.

Diversification

Diversification is one method that is used to reduce investment risk. Diversification can be achieved by investing in different asset classes (e.g. Australian and international securities, Australian and international fixed interest, property and cash).

VMAPS Super offers a range of Investment Models through which investors can seek to invest in a diverse range of asset classes.

Choosing your Investment Model(s)

Investors are able to choose one or a combination of Investment Models available under VMAPS Super. The Investment Models that suit each investor will depend on various factors based on personal circumstances. Your financial adviser can assist you in assessing which Investment Model(s) most suit your personal needs.

The Investment Models available to investors in VMAPS Super are listed below. The actual allocation of each Investment Model will vary over time, usually within ranges set by the Investment Model Manager under a mandate agreed with Ventura. Each Investment Model has its own investment objectives and strategy.

Changing Investment Model(s) in your Account

You may change Investment Model(s) in your Account at any time. There are no administration or investment switching fees for switching between Investment Model(s), although transaction costs may apply. You should always consult your financial adviser before you select any Investment Model, or decide to increase or decrease your holding in any Investment Model.

PROFILE DESCRIPTIONS

Important terms and information used in the description of Investment Models are explained below.

Investment Objective

This is the goal of each Investment Model. The objectives described below for each Investment Model should not be considered an indication of the possible future performance of the relevant Investment Model, or of VMAPS in the future. There is no guarantee that the investment objectives will be achieved over any or all time periods.

Who is this option suitable for?

The type of investor for whom the Investment Model would be suitable, taking into account the objectives and asset profile of the Investment Model.

Investment Strategy and Approach

The strategy for a particular Investment Model is the means by which the Investment Model Manager seeks to achieve its investment objective for the Investment Model. Actual asset allocations may vary within the range identified.

Asset Allocation

The asset allocation is the percentage of the assets that are invested in each asset class. The asset allocation is determined by an investment range and a benchmark asset allocation target. At times the Investment Model Manager will move the actual asset allocation away from the benchmark to maximise investment performance. The asset allocation will always remain within the asset class range unless the Investment Model Manager and Ventura agree to a variation to the Investment Model.

Risk Level

All investments carry some level of risk. To help you understand your investment risk we have rated the Investment Models based on the potential for a negative return over a specified period.

Investment Earnings

The Responsible Entity and Investment Model Manager(s) do not guarantee investment earnings and/or returns. The value of your investment(s) in an Investment Model and therefore the Scheme may rise or fall. Past performance should not be taken as an indication of future performance.

Model Management Fee

The Model Management Fee for an Investment Model is an estimate of the investment management costs for managing the Investment Models and is charged by Ventura.

Ventura pays the fees levied by the Investment Model Manager out of the Model Management Fee.

Investment Models are managed by the Investment Model Manager(s). Underlying investment costs may vary from time to time, based on changes in allocation of the underlying investments within the Investment Models.

Updates to Investment Information

The target asset allocation may vary from time to time within the ranges detailed in the investment strategy of the Investment Model. The investment information provided on the previous pages is current as at the date of this Investment Model Menu. Updated information can be obtained from www.venturafm.com.au.

Model Profile	Ventura Morningstar Australian Shares Inc	come Mod	del			
Code	VI0012					
Investment description	This is an actively managed concentrated portfol	This is an actively managed concentrated portfolio consisting of our best income ideas in the S&P/ASX 200 Index.				
Investment objective	To outperform the S&P/ASX 200 Accumulation Index over a complete cycle.					
Who is this option suitable for?	The Australian Shares Income Investment Model may suit those investors seeking a reliable, above-market average income yield with moderate long term capital growth relative to that of the performance benchmark.					
Investment strategy and approach	An actively managed and concentrated portfolio consisting of ASX-listed stocks. The portfolio focuses on companies with competitive advantages, market prices offering a margin of safety and a sustainable dividend yield above the benchmark, including franking credits. This combination of factors helps to preserve capital and reduce volatility in various market environments. Total return will tend to be driven more by income than capital appreciation, although both are of course desirable.

Model Profile	Ventura Dimensional Defensive Model					
Code	VD0001					
Investment description	This is a diversified portfolio of predominantly income asset classes, with a small proportion of growth asset classes.					
Investment objective	To achieve a consistent income return by investing in a diversified portfolio of predominantly income asset classes, with a small proportion of growth asset classes.					
Who is this option suitable for?	The Defensive Model Portfolio may suit those investors whose main objective is stability of income and preservation of capital. A lower risk of capital loss can be expected, but overall returns are also likely to be lower.					
Investment strategy and approach	To provide a total return, consisting of income and capital appreciation, by gaining exposure to a diversified portfolio of companies and real estate securities listed on approved developed and emerging markets, and domestic and global fixed interest securities. The Investment Model will seek to target approximately 15% exposure to equities and 85% exposure to fixed interest assets.

Model Profile	Centrepoint Active Conservative Model					
Code	CE0021					
Investment description	A diversified portfolio of unlisted managed funds and ETFs with a neutral exposure of 30% to growth assets and 70% to defensive assets, there are no tactical or dynamic tilts taken by the manager. The portfolio is constructed using a combination of active and passive strategies, with passive strategies being utilised to provide market beta at a low cost in sectors where Centrepoint does not believe that active managers have demonstrated an ability to consistently generate alpha.					
Investment objective	To deliver returns exceeding the investment benchmark (listed below) over rolling 3 year periods, net of investment management fees.					
Who is this option suitable for?	This suits investors with a minimum three-year timeframe or those that seek a diversified portfolio of interest bearing and growth asset classes, with an emphasis on interest bearing assets. This portfolio also suits investors seeking a lower level of investment value volatility, and therefore willing to accept lower potential investment performance, hence the 70.0 percent exposure to defensive assets (cash and fixed interest).					
Investment strategy and approach	The manager does not believe that one particular investment style will outperform over the longer term and as a result the portfolios are constructed with no structural style bias. Centrepoint advocates a focus on downside protection and capital preservation. Active management may provide greater alpha in some sectors and not others, as a result the manager uses a combination of active and passive strategies.

Investment strategy and approach	The manager does not believe that one particular investment style will outperform over the longer term and as a result the portfolios are constructed with no structural style bias. Centrepoint advocates a focus on downside protection and capital preservation. Active management may provide greater alpha in some sectors and not others, as a result the manager uses a combination of active and passive strategies.

Model Profile	Centrepoint Low Cost High Growth Model						
Code	CE0030						
Investment description	A diversified portfolio of unlisted managed funds and ETFs with a neutral exposure of 85% to growth assets and 15% to defensive assets, there are no tactical or dynamic tilts taken by the manager. The portfolio is constructed using predominately passive strategies, with a small exposure to low cost smart beta strategies.						
Investment objective	To deliver returns exceeding the investment benchmark (listed below) over rolling 9-year periods, net of investment management fees.						
Who is this option suitable for?	This suits investors with a minimum nine-year timeframe or those who are willing to accept high levels of investment value volatility in return for high potential investment performance. The 85.0 percent exposure to growth assets (shares, listed property and infrastructure) means that capital stability is only a minor consideration.						
Investment strategy and approach	The manager does not believe that one particular investment style will outperform over the longer term and as a result the portfolios are constructed with no structural style bias. Centrepoint advocates a focus on downside protection and capital preservation. Active management may provide greater alpha in some sectors and not others, as a result the manager uses a combination of active and passive strategies.

Model Profile	Centrepoint Low Cost High Growth Plu	s Model					
Code	CE0031						
Investment description	A diversified portfolio of unlisted managed funds and ETFs with a neutral exposure of 95% to growth assets and 5% to defensive assets, there are no tactical or dynamic tilts taken by the manager. The portfolio is constructed using predominately passive strategies, with a small exposure to low cost smart beta strategies.						
Investment objective	To deliver returns exceeding the investment benchmark (listed below) over rolling 10-year periods, net of investment management fees.						
Who is this option suitable for?	This suits investors with a minimum ten-year timeframe or those who are willing to accept very high levels of investment value volatility to maximise potential investment performance. The 95 percent exposure to growth assets (shares, listed property and infrastructure) means that capital stability is not a consideration.						
Investment strategy and approach	The manager does not believe that one particular investment style will outperform over the longer term and as a result the portfolios are constructed with no structural style bias. Centrepoint advocates a focus on downside protection and capital preservation. Active management may provide greater alpha in some sectors and not others, as a result the manager uses a combination of active and passive strategies.
